EDUCATION

New York University

New York, NY

Bachelor of Arts in Computer Science, Minor in Data Science

May 2025

- **Coursework:** Algorithms; Data Structures; Data Analysis; Operating Systems; Causal Inference; Computer Systems; Computer Security; Linear Algebra; Calculus II; Statistics; Discrete Math; Macro & Micro Economics; Spanish IV
- **Organizations:** Zeta Psi Fraternity (President); Tech@NYU (Project Lead); Google Developer Student Club (Social Media Manager); NYDM (Team Captain); Tech Treks; BUGS@NYU; Varsity Wrestling; Stern Rugby
- **Awards:** Dean's List 3x; IAAC Scholar-Athlete All-American; Sommers Scholarship Recipient

EXPERIENCE

U.S. CENTURY BANK

Miami, FL

Software Engineer & Data Scientist Consultant

May 2024 - Present

- Designed profitability model using SQL, Python, and Power BI to rank accounts and suggest changes, increasing revenue
- Built a cybersecurity system that periodically verifies file integrity using hash comparisons and sends alerts of tampering
- Developed Python-based archive system to relocate files older than a specified date, optimizing system performance

NYU 404 FITNESS

New York, NY

Supervisor & Data Scientist

Sep 2022 - Present

- Optimized gym hours and staffing schedules using Python, Pandas, and Excel, aligning with budget constraints
- Initiated an anti-theft campaign, reducing theft by up to 50% through strategic signage and staff rotation
- Selected as the youngest-ever supervisor to coordinate a team of 50+ attendants, handling hiring and scheduling

TECH@NYU

New York, NY

Former Project Lead

Feb 2023 - Present

- Mentored a 12-student cohort (5% acceptance rate) in four software engineering projects, enhancing programming skills
- Initiated development of a website to archive and showcase past projects, fostering community and alumni engagement
- Organized office visits to companies like Epic Games and Netflix for practical learning experiences

SCALE AI

Remote

Software Engineer - AI Consultant

Jan 2024 - Apr 2024

- Conducted reviews of AI-generated content and code, ensuring compliance with company standards
- Enhanced AI models by identifying efficient algorithms in AI-generated code, improving content accuracy

PROJECTS

PAIRWISE TRADING ALGORITHM & ENGINE

Jun 2024 - Jul 2024

- Developed Full-Stack trading engine and strategy using correlation, cointegration, stationarity, Alpaca API, and Streamlit
- Created visualizations for price ratios, dynamic moving averages, z-scores, and cumulative returns that average 15%

PRECEDENT PARSER

Oct 2023 - Dec 2023

- Led a team to create a web scraper and website using Python and HTML/CSS, aiding legal research for precedent cases
- Utilized Open-AI and ScrapeOPS API'S to search data, providing citations, summaries, probabilities, and case strategies

LYFT FORAGE JOB SIMULATION

Feb 2023 - Mar 2023

- Inherited and refactored a complex codebase, drafting a UML class diagram for system reorganization
- Implemented unit tests and added tire-wear detection for service decisions using test-driven development
